

Team Name: sdmay24-36

Team Members: Kyle Geerts, Mac Whitney, Johnny Tran, William Nash, Reese Jamison, Alec Frey

Report Period: Sept 25-Oct 8

Summary of Progress in this Period

Continued work with ChatGPT, trying to mess around in the user interface to record interactions that we can show to our client. Document both good and bad interactions so that we can get feedback on what to try or stop trying. We implemented new ideas into the testing, like rubrics and better prompt engineering. We are also starting to dig deeper into the exploration of the OpenAI API. Now that we have access to the API, we can start testing each ChatGPT model like 3.5-turbo or 4. Lastly, we continued work on the design documents and recording lightning talks.

Pending Issues

N/A - just continued work with the model

Plans for Upcoming Reporting Period

- Start to interact with the ChatGPT API
 - Document interactions with the API
 - Start to use the ChatGPT-4 UI, now that we have access
 - Continued work on the design document
 - Look into prompt engineering for training
-
